Subject: L.E. Carpenter & Company, Wharton, New Jersey ~ NJD002168748
Monthly Enhanced Fluid Recovery (EFR)
Project No. 00-03868.36

Dear Anthony:

Based on our conversation on March 6, 2003, RMT understands that both the NJDEP and United States Environmental Protection Agency (USEPA) have received the appropriate number of copies of the report entitled Focused Feasibility Study Lead Impacted Soil Remediation (RMT, February 2003) as required in the NJDEP letter dated January 22, 2003.

As also discussed during our March 6, 2003 conversation, this letter serves to notify both the NJDEP and USEPA that the EFR events scheduled for both January and February 2003 were not able to be accomplished due to excessive snow cover existing on the eastern portion of the LEC site. As a result of recent thawing, RMT has arranged for three (3) EFR events to be conducted in March. These three events will be conducted weekly starting on March 10th, and will continue on March 17th and March 24th 2003. The data generated from these three events will be reported in the 1st quarter 2003 monitoring report.

If you have any questions, please contact me at your convenience.

Sincerely,

RMT, Inc.

Nicholas J. Clevett
Project Manager
